

Useful functions

const newTransactionDate = newGiftDay => {

```
    const currentDate = new Date();
    const nextMonth = currentDate.getMonth() + 2 <= 12 ?
currentDate.getMonth() + 2 : 1;
    const nextDate = newGiftDay;
    const nextYear =
        nextMonth > 0 ? currentDate.getFullYear() : currentDate.getFullYear() + 1;

    return `${nextMonth}/${nextDate}/${nextYear}`;
};
```

=====

```
/**
 * Note: Currently factored for the paused Pledge Modal.
 * It could be refactored to a global nextTransactionDate method.
 * @param {number} days
 * @returns formatted date string
 */
const nextTransactionDate = days => {
    const currentDate = new Date();
    const pauseDate = new Date(currentDate.setDate(currentDate.getDate() +
days));

    const pauseDateMonth =
        pauseDate.getMonth() + 1 < 10
        ? "0" + (pauseDate.getMonth() + 1)
        : pauseDate.getMonth() + 1;
    const pauseDateDay =
        pauseDate.getDate() < 10 ? "0" + pauseDate.getDate() : pauseDate.getDate();
    const pauseDateYear = pauseDate.getFullYear();

    return `${pauseDateMonth}/${pauseDateDay}/${pauseDateYear}`;
};
```
